

RECS To Cash

Turning Your RECs into Cash — Brokers Who Can Help You Do It.

This document contains a short list of companies and contacts that help broker and trade renewable energy credits (RECs) for both the compliance and voluntary markets nationwide. From WREGIS (in 14 Western states plus British Columbia and Alberta) to the New Jersey SREC market and everything in between, these are two companies that can help you sell your RECs easily.

This list is for informational purposes only and Fat Spaniel does not endorse nor make any warranty of any type with respect to the companies or information contained herein.

ICAP United, Inc. – Contact: Matt Zito

About ICAP and ICAP United:

ICAP is the world's largest inter-dealer brokerage firm. Headquartered in London, ICAP has over 200 offices worldwide and brokers deals daily totaling on average \$1.6 trillion of transactional value. ICAP United is ICAP's environmental emissions team and is located in Sugar Land, TX. ICAP United handles domestic emission allowances, carbon commodities and renewable energy credits.

ICAP has clients interested in investments of both individual year and multiple year packages of solar RECs sourced from the United States. Solar RECS from the PJM market and California are of particular interest.

Matt Zito is involved with the renewable energy credit compliance and voluntary markets nationwide.

Spectron Energy Inc – Contact: Jonathan Brown

About Spectron Energy:

Spectron Energy acts as a neutral introductory broker and does not trade or take market positions. Spectron Energy's role is simply to put buyers and sellers together, and because of this they believe they can achieve better prices for their clients than they might receive through other channels.

Jonathan Brown is active in all major energy markets and deals with both compliance and voluntary REC markets across the country in every power region for all renewable resources.
